

PARKS & RECREATION

KING COLORCORE®

KING COLORCORE®

The Multi-Color Engravable Polymer Sheet

King ColorCore® is a versatile multi-color engravable high-density polyethylene sheet with multiple layers of contrasting colors. It is a superior homogeneous sheet, a product of a unique state-of-the-art continuous process called Polyfusion, and manufactured to the highest standards in the industry. King ColorCore® has a matte finish on both sides of the sheet. It is environmentally stabilized to withstand the harshest outdoor conditions. King ColorCore® will not rust, delaminate or rot when exposed to UV, humidity or water. King ColorCore® is made with high-impact-resistant polymer to handle more abuse than conventional sign materials. Its thin cap layers and bright primary colors make it ideal for signage, marine, playground and recreational applications. For maximum versatility, standard colors are made to coordinate with King ColorBoard®. The polymer sheet never needs painting or refinishing, works like wood and it is easy to fabricate using common woodworking tools and techniques. The material is easy to engrave and machine, as the cap is approximately .050" thick.

Features and Benefits

- ✓ UV Stabilized
- ✓ High-Impact Strength
- ✓ Maintenance Free
- ✓ Easy to Engrave
- ✓ Custom Sheet Sizes, Gauges and Colors Available
- ✓ Distributed Worldwide
